

# Cut your tooling costs **in half**

- Tools remanufactured to 'good as new'
- Remanufacture tools multiple times
- Reduce your carbon footprint

INFINITE POSSIBILITIES.®

**QUICKGRIND**®  
carbide tooling

## Increase productivity **Maximise profitability**

### Try Quickgrind's tool remanufacturing service

Just because tools are worn doesn't mean it's time to throw them away.

Manufacturing companies have implemented modern process control techniques, but they are still missing significant savings from tool remanufacturing.

Quickgrind's remanufacturing service returns tools to their original condition, providing 'good as new' performance at a fraction of the cost of new tools. And overall tool cost savings can be as much as 50%.

#### **Correct tool management equals higher production efficiencies**

Time is money. The moment a tool is worn you are already paying the price. If your usual practice is to replace with a brand new tool and throw the worn one away, then it is time to try Quickgrind's remanufacturing service.

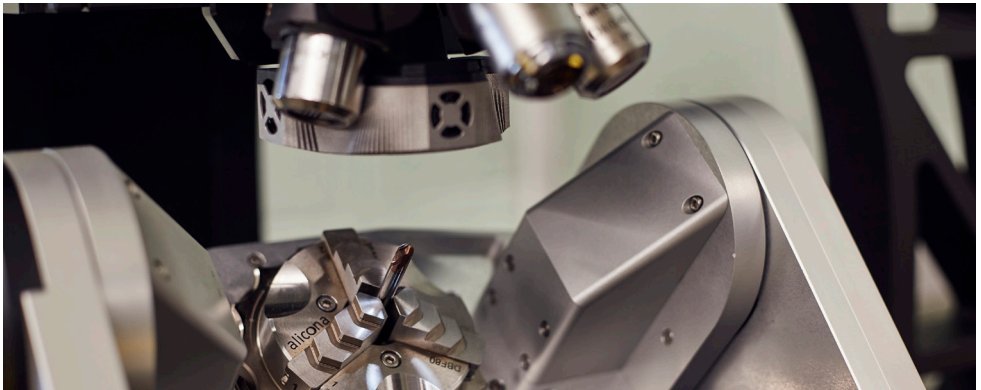

Quickgrind's remanufacturing system, QuickEdge, keeps your productivity on track. You know components will be finished on time to the highest standards and tolerances.

#### **Remanufacturing – not regrinding**

Many companies have tried regrinding and found it to be a compromise – a quick fix. Tool performance is unpredictable and tool life reduces dramatically. Reground tools invariably stay in the drawer, wasting money and increasing tooling costs.

The QuickEdge process refurbishes tools to an 'as new' condition. Stable and predictable performance quickly becomes the norm in your production process.

*Below, opposite and over: Using Alicona 3D metrology, we precisely assess tool wear prior to remanufacture, ensuring tools going through the QuickEdge process meet original 'good as new' performance standards*

# Put us to the test with the **QuickEdge trial offer**

Get up to 10 identical (6-16mm) carbide cutting tools remanufactured for just £25.

## HOW IT WORKS

Receive your 10 'as new' tools by following these two easy steps:-

**Step 1:** Set-up your Quickgrind account at <https://quickgrind.net/application/>

**Step 2:** Complete the online order form at <https://quickgrind.com/rmoffer/>

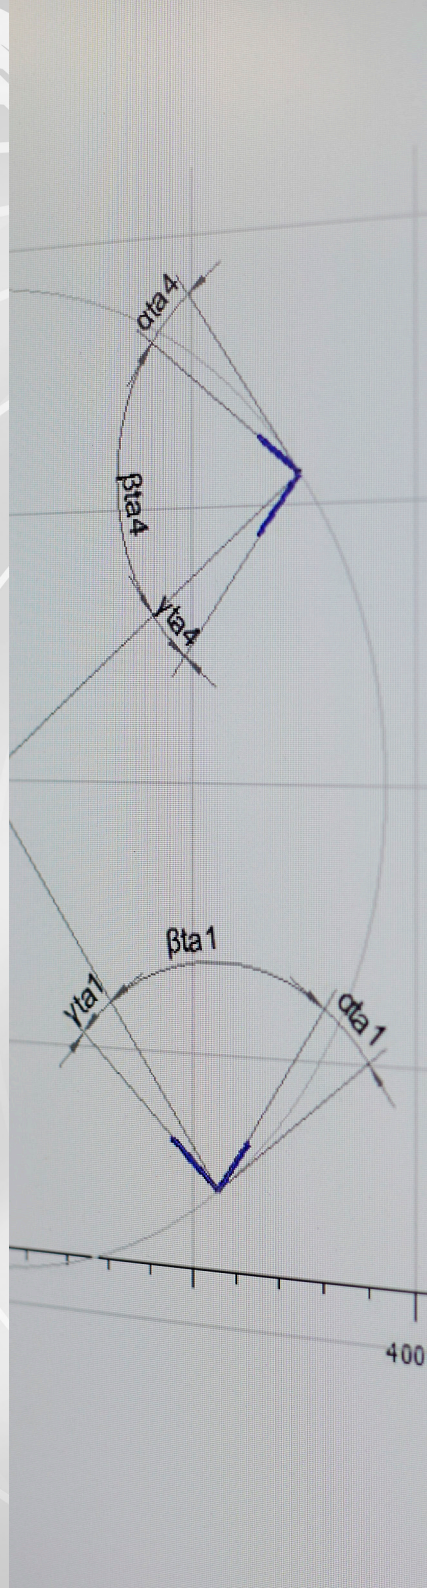

As soon as we've received your form we'll invite you to send us up to 10 of your existing cutting tools which we will put through our QuickEdge remanufacture process.

You'll then receive your 'good as new' tools – all for a trial offer price of just £25 – and you can put them to the test to see how well they perform.

For total peace of mind, our ISO quality standards ensure your tools will be safe with us whilst they undergo remanufacture.

If you've got any questions about the QuickEdge remanufacture trial offer our customer support team are just a phone call or email away.

# Engineered to give your business a unique cutting edge

As a world leader in innovative industrial carbide cutting tool manufacture, Quickgrind supports customers globally with quality products and services reflecting the very best in British engineering heritage.

Designed to give your business a unique cutting edge, our Total Solutions Engineering approach offers comprehensive off-the-shelf tools, tooling performance consultancy, rapid design and delivery of tailored tools, cost-cutting tool management systems, as well as a remanufacturing process guaranteed to save you money.

*A Quickgrind tool review helped  
a Tier 1 aerospace manufacturer  
cut their tool library from 32 to just  
9 tools — boosting productivity  
and reducing costs without  
compromising performance*

## Enhance productivity

With a Quickgrind tool review you can improve business performance and significantly reduce costs by matching the right tool for the job. Following a review for a Tier 1 aerospace manufacturer, we proved that they could reduce their tool library from 32 to 9 tools without impacting performance.

**Expect more from your tool supplier.**
